Interested in adopting SafeCare®?

The **National SafeCare Training and Research Center** (NSTRC) is offering training and implementation support as part of research at no cost!

**What is SafeCare?**
- SafeCare is an evidence-based behavioral parenting program shown to reduce child neglect and physical abuse.
- SafeCare targets three skills: positive parenting, home safety, and child health.

**What’s required?**
- To be considered, each applicant must be currently conducting in-home services.
- Each must identify multiple teams of providers, and agree to allow NSTRC to randomly assign them to be trained in SafeCare immediately, or at a later time (once data collection is complete).
- Each site must assist with obtaining data from families. NSTRC will conduct all data collection, but sites must assist in connecting families with NSTRC.
- Each site will receive SafeCare Trainer training which will allow the site to sustain and expand SafeCare.

**I’m interested. How can I find out more?**
- Interested agencies must complete an application demonstrating readiness and capacity to implement SafeCare. Applicants will be selected based on their ability to implement SafeCare and meet the requirements of the grant.

A formal call for applications is expected Summer 2015.

For more information on SafeCare, see [www.safecare.org](http://www.safecare.org)
